(a) Post-shock temperature
Ideal gas, $\gamma = 1.4$
JANAF air, no dissociation (solver thermo)
Equilibrium air, O_2/N_2 dissociation
blastFoam, Ma 14.5
Post-shock temperature [K]
Shock Mach number
(b) Density ratio
Ideal gas, $\gamma = 1.4$
JANAF air, no dissociation
Equilibrium air
blastFoam
ρ_2/ρ_1 [-]
Shock Mach number
(c) Temperature at 100 μs
blastFoam
Equilibrium T_2
Temperature [K]
x [m]
(d) Density at 100 μs
blastFoam
Equilibrium ρ_2
Density [kg/m^3]
x [m]
